

IT'S ALL IN THE MIX!

Autumn Friends – unique combinations of perennials and pot carnations, grasses, herbs and lavender with almost unlimited possibilities. The tested varieties guarantee an attractive and colourful appearance with long-lasting and late blossoms well into November.

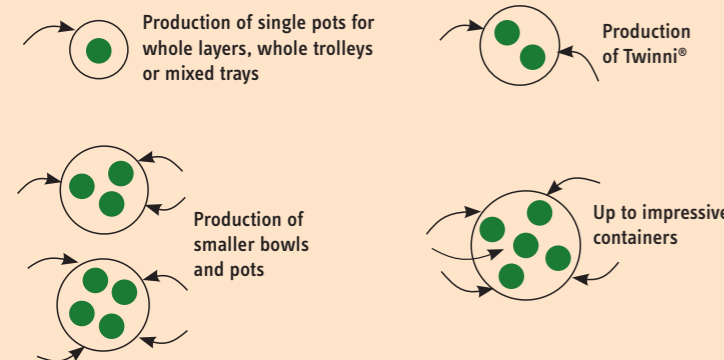

The individual varieties can be grown from single pots for whole layers or mixed trays, from a large number of twinnies and smaller bowls, all the way up to impressive containers and themed CCs. They can be grown individually or cultivated together directly from seedlings. The cultivation times are short, and there is no need for special growing conditions or further expenditure.

Great benefits for Growers

Many varieties are available as both RC and MiniRooter®. In their paper pots, the MiniRooter® absorb lots of energy under optimal climate conditions and continue to grow rapidly in the pot after processing. Before being shipped, they are optimally hardened off and perfectly conditioned. A breathable box optimised for transport stability provides good protection. Our customers receive a unique product for quick-start growth after potting. By choosing the right product type, you can significantly influence labour and energy costs, culture time and area productivity.

EVERYTHING IS POSSIBLE.
